The Federal Communications Commission is considering taking actions that will restrict consumer choice by deregulating local phone service.

Millions of Americans like me could have their phone service threatened if the local phone companies aren't required to allow competitors access to the market. I'm also concerned about the Commission's move to relieve all broadband Internet access facilities of open access obligations.

Both of these key decisions will limit my choices as a consumer by lessening competition, diminishing cost savings and threatening consumer protections. As a constituent, I urge you to support competition and open access for local phone service.

Sincerely,

Burnett Moody

The Federal Communications Commission is considering taking actions that will restrict consumer choice and limit local phone service.

Millions of Americans like me could have their phone service threatened if the local phone company is not required to allow competitors access to the market. I'm also concerned about the Commission's move to relieve all telephone companies of their obligations to provide open access facilities of open access obligations.

Both of these key actions will limit my choice as a consumer by increasing the cost of service and thereby increasing consumer choice. As a constituent, I urge you to support competition and open access for local phone service.

Sincerely,

peter o. & sylvia sendall
